MEMORANDUM FOR: Acting Chief, Operations Group

FROM:

Chief, Field Coverage Staff

STAT

SUBJECT: Alexandria Coverage Projections

1. Attached are projections of coverage available to a monitoring operation in Alexandria, Egypt worked up by

STAT

2. Two points must be emphasized regarding these projections:

a. We have never conducted a reception survey from the Alexandria area, so these projections are based solely on our incomplete knowledge of propagation in the area of and the facilities being used by various stations.

b. The projections assume access to a monitoring site with a full complement of rooftop antennas (longwires, dipoles etc.) located in an area of relatively low electromagnetic noise.

3. The projections are not particularly encouraging, either for coverage of the primary targets- or for other coverage in the general area. Briefly:

STAT

STAT

-- Alexandria probably would not provide any other unique coverage.
